— a vision beyond —

What is AI?

Artificial Intelligence (AI) emphasizes the creation of intelligent machines which work and react like humans. It finds applications in speech recognition, learning planning, problem solving, health care, logistics and other fields.

Machine learning is a subset of AI which uses statistical methods to enable machines to improve experiences. Deep learning is another subfield of machine learning concerned with algorithms inspired by the structure and function of the brain called artificial neural network.

AI assists the creation of networks, dotting machines with capability to learn, reason and act based on the information gathered during the industrial process.

Course Experts

Eminent resource person from renowned Industry, Research and Academic Institutes

Course Duration - 40hrs

Prerequisites -

Exposure of basic Mathematics and any Programing Language or Tool

Course Fees - INR 15,000/- only

Who can apply -

Working professionals, fresh graduates, post graduates in engineering, commerce, science, medical, management and all those who want to learn AI

Course Content

- Introduction to AI and ML
- Python Programing for AI
- Introduction to Neural Network
- AI Algorithms
- Tensor Flow
- Case Studies and Project Development

Career Opportunities

AI opens career opportunities in private companies, public organizations, education, healthcare, government agencies and defence organizations.
